Circulation Research

SUBJECT INDEX

VOLUME XIII — JULY-DECEMBER, 1963

A

Absorption, capillary, coefficient in shock, 105
Acetyl strophanthidin
antagonistic effects on sinoatrial node of adrenergic stimulation and, 388
effect on myocardial electrolyte and water content in congestive heart failure, 207
Acidosis, epinephrine response during, 64
Actin
amino acid composition in cardiac and skeletal muscle, 474
from heart muscle, isolation and purification of, 187
properties of, 187
Adenosine diphosphate, blood platelet and cell aggregation, 392
Adrenal glands, during myocardial necrosis, 159
Adrenergic nerve, stimulation, antagonistic effect on sinoatrial node, 388
Allantoic fluid, and influenza A virus in production of congenital cardiac disease in chick embryo, 572
Alveoli, gas diffusion to large pulmonary vessels, 71
Amino acids, in actin of cardiac and skeletal muscle, 474
ε-Aminocaproic acid, effect on fibrinogen turnover, 432
Anemia, dextran, myocardial blood flow, and oxygen uptake in, 172
Angiotensin
effect on intact forearm veins of man, 239
in lymph and renal venous blood, production by low pressures, 336
renal effects in pregnancy, 232
Aorta
atherogenesis, histochemical studies, 401
pressure transients in, 585
thromboplastic and fibrinolytic activity in wall layers, 253
Arrhythmia
dependence upon electric current and cardiac cycle, 21
digitalis-induced, effects of reserpine and βTM 10, 149
following condenser discharge, 21
intracardiac pressures and, 39
ouabain-induced, 132
Arteries
carotid
injection of radioalbumin and effects of CO_2 on cerebral hemodynamics, 436
poststenotic dilatation, 537
computer analysis of pressure and flow, 3
coronary, atherogenesis, 401
femoral, poststenotic dilatation, 537
poststenotic dilatation, 537
pulmonary
constricted, cardiac performance during exercise, 410
hypertension in newborn calf, 557
oxygen and nitrogen ventilation on flow and pressure, 478
thromboplastic and fibrinolytic activity in wall layers, 253
Arteriocapillary sphincters, reactivity, vasoconstrictor nerve impulses, and norepinephrine in shock, 105
Arterioles, reactivity, vasoconstrictor nerve impulses, and norepinephrine in shock, 105
Atherogenesis, coronary, histochemical studies, 401
Atherosclerosis
effect of group isolation in cholesterol-fed cockerels, 246
environmental changes, effect on, 246
histochemical studies, 401
Atrioventricular conduction system, premature atrial activation of, 308
Atrioventricular node
conduction of premature atrial responses, 308
rhythm affected by right and left heart pressures, 39
Atrium
premature responses, atrioventricular conduction, 308
pressure
left atrial and left ventricular end-diastolic, 261
waves and aortic pressure transients, 585
rhythm, effect of increased transmural pressures, 39

B

Blood
cells, aggregation by 5-hydroxytryptamine, 392
coagulation
changes in rats fed high-fat diets, 529
effect of ε-aminocaproic acid on fibrinogen turnover, 432
fibrinogen, effects on viscosity, 48
5-hydroxytryptamine aggregation of platelets and cells, 392
myocardial flow during red cell increments, 172
oxygen uptake during red cell increments, 172
platelets, 392
red cell increments, 172
rheology, 48
viscosity, effects of fibrinogen on, 48
Blood flow
boundary layer flow, 580
calf muscle, effects of epinephrine on tissue clearance, 56
cerebral, radioalbumin studies, 436
coronary
alterations of, and oxygen usage of nonworking heart, 501
and cardiac performance, 522
effect of Eledoisin, 329
myocardial oxygen usage and, 497, 501, 510, 514, 522
countercurrent, vasa recta and, 290
in ductus arteriosus, 478
epinephrine effects
coronary, 329
in human calf muscle, 56
intrarenal distribution determined with Kr^{85}, 290
myocardial, and oxygen uptake during acute red cell increments, 172

nutrient, intrarenal distribution, 290
oxygen uptake and usage, 172, 497, 501, 510, 514, 522
pulmonary, induced changes in pattern of, 119
pulsatile, and pressure analysis in distensible vessels by computer, 3
rheology of human blood, 48
Blood pressure
aortic, pressure transients of, 585
atrial, aortic pressure transients of, 585
coronary, and myocardial oxygen usage, 497, 501, 510, 514, 522
depressor effects of renal medullary extracts, 359
hypertension
experimental renal, vasopressor material in, 552
pulmonary arterial, in newborn calf, 557
hypotension, 359
vasopressor material in renal hypertension, 552
Blood vessels
coronary, atherogenesis, 401
pulmonary, reflex constriction produced by right-heart catheterization, 119
Blood volume, hypervolemia during acute red cell increments, 172
Body surface potentials, distribution analyzed by computer, 373
Bradykinin, on coronary blood flow, comparison with Eledoisin, 329
Brain, vascular disease and effects of carbon dioxide on cerebral hemodynamics, 436
Burns, thermal, effects of hydralazine and dextran on circulatory responses to, 468

C

Calf, newborn, production of pulmonary arterial hypertension, 557
Capillary sphincters, reactivity, vasoconstrictor nerve impulses, and norepinephrine in shock, 105
Carbon dioxide
cerebral circulation in cerebrovascular disease, 436
effects on epinephrine response, 64
Cardiac glycosides
acetyl strophanthidin
antagonistic effects on sinoatrial node, 388
and myocardial electrolytes in congestive cardiac failure, 207
Cardiac murmurs, damping of sound, 352
Cardiac muscle. *See* Heart muscle and Myocardium
Cardiac necrosis
myocardial, and histopathological alterations in rats, 159
potassium deficiency and corticosteroids, 420
Cardiac output
comparison of Fick and photoelectric earpiece measurement, 80
during exercise in dogs with pulmonary stenosis, 410
hypotensive agents, effects on, 468
response to severe thermal burns, 468
Carotid artery
injection of radioalbumin and effects of CO_2 on cerebral hemodynamics, 436
poststenotic dilatation, 537
Catecholamines, reserpine and βTM 10 on digitalis-induced ventricular arrhythmias, 149
Catheterization, reflex effects on pulmonary blood flow, 119
Cells, red, myocardial blood flow and oxygen uptake during acute increments, 172
Cerebral circulation
atherogenesis, histochemical studies, 401
carbon dioxide effects in cerebrovascular disease, 436
Cerebrovascular disease, carbon dioxide effects on cerebral hemodynamics, 436
Cholesterol, group isolation and atherosclerosis in cockerels, 246
Chondroitin sulfate, in early coronary atherogenesis, 401
Coagulation
of blood in rats fed high-fat diets, 529
and ϵ-aminocaproic acid, 432
Cockerels, effect of isolation and cholesterol feeding on atherosclerosis in, 246
Collagen, in early coronary atherogenesis, 401
Computers
analysis of pulsatile pressure and flow in distensible vessels, 3
digital, analysis of body surface potentials with implanted generators, 373
Condensers, discharges, cardiac arrhythmias produced by, 21
Contractility, myocardial, effect of Eledoisin, 329
Coomassie Blue dye, comparison of Fick and photoelectric earpiece measurement of cardiac output, 80
Coronary artery, histochemical studies of atherogenesis, 401
Coronary circulation
alterations of coronary blood flow, 501, 510
atherogenesis, histochemical studies, 401
blood flow, oxygen uptake, anemia, and transfusion, 172
and cardiac performance, 522
myocardial oxygen usage and, 497, 501, 510, 514, 522
oxygen uptake and usage, 172, 497, 501, 510, 514, 522
polypeptides, effects of, 329
Corticosteroids, relation to cardiac necrosis, 420
Countercurrent blood flow, vasa recta and, 290

D

Damping, of heart sounds on the chest surface, 352
Defibrillation, electrical, cardiac arrhythmias produced by condenser discharge, 21
Dextran, high molecular weight, effect on circulatory responses to severe thermal burn, 468
Diet, high-fat, and blood coagulation, 529
Diffusion, of hydrogen into lungs through large vessels, 71
Digital computers, analysis of body surface potentials with implanted generators, 373
Digitalis
cardiac arrhythmia induced by ouabain, 132
ventricular arrhythmia induced by, effects of reserpine and βTM 10 on, 149
Dilatation, poststenotic, production and time course of, 537
Dipole, equivalent, surface potentials, myocardially implanted generators, 373
Ductus arteriosus, blood flow, effects of oxygen and nitrogen in vivo and in vitro, 478
Dye dilution. *See also* Indicator dilution
comparison of Fick and photoelectric earpiece measurement of cardiac output, 80

E

Elastic fibers, in early coronary atherogenesis, 401
Electric current, effect on myocardium at high voltage, 21
Electrical activity, atrioventricular conduction, 308

Electrocardiogram
aortic and atrial pressure transients and, 585
digital computer analysis, implanted electrodes, 373
QRS, nondipolar patterns, 373
Electrolytes, myocardial content in congestive cardiac failure, 207
Eledoisin, cardiovascular effects of, 329
Embolism, microembolism by 5-hydroxytryptamine, 392
Embryo, chick, production of congenital cardiac disease, 572
Endecapeptides, Eledoisin, 329
Endothelium, injury with turbulent flow, 580
Enzymes, in serum during myocardial necrosis, 159
Epinephrine
antagonistic effects on sinoatrial node of acetyl strophanthidin and, 388
on blood flow
coronary, comparison with Eledoisin, 329
in human calf muscle, 56
effect on mechanical and phosphorylase activity of normo- and hypothermic hearts, 199
effects of CO_2 on dose response, 64
intra-arterial and intravenous, effects on blood flow in human calf muscle, 56
Epsilonaminocaproic acid, effects on fibrinogen turnover, 432
Erythrocytes, acute increments in, myocardial blood flow and oxygen uptake during, 172
Exercise
cardiac performance in dogs with pulmonary stenosis, 410
effects on heart size, 448

F

Fat, diets high in, and blood coagulation, 529
Femoral artery, poststenotic dilatation, 537
Fibrillation, ventricular, by condenser discharges, 21
Fibrin, deposition on vessel walls, 253
Fibrinogen
effect of ε-aminocaproic acid on turnover, 432
effects on blood rheology, 48
kinetics of turnover, 432
Fibrinolytic activity, in aorta and veins, species differences, 253
Fick measurement, of cardiac output, compared with photoelectric earpiece measurement, 80
Filtration, capillary, coefficient in shock, 105
Flow. *See also* Blood flow
boundary layer, and endothelial injury, 580
rheology of human blood, 48
through distensible vessels, 3
turbulent, and endothelial injury, 580

G

Gas exchange, between lung and large pulmonary vessels, 71
Generators, body surface potentials from myocardial implantation, 373
Glands, adrenal, during myocardial necrosis, 159
Glycosides
cardiac
antagonistic effects on sinoatrial node of acetyl strophanthidin, 388
in congestive heart failure, 207

H

Heart
acetyl strophanthidin
antagonistic effects on sinoatrial node, 388
and myocardial electrolytes in congestive failure, 207
arrhythmias
digitalis-induced, 149
during stimulation, 21
effects of reserpine and βTM 10, 149
intracardiac pressures and, 39
ouabain-induced, 132
atrioventricular conduction system, 308
blood flow and oxygen uptake during acute red cell increments, 172
catheterization, right reflex effects on pulmonary flow, 119
congenital malformations by influenza A virus and allantoic fluid, 572
contractility, effect of Eledoisin, 329
hypothermia, effect of epinephrine, 199
malformations caused by influenza A virus and allantoic fluid, 572
mechanical activity, effect of epinephrine, 199
membrane potentials, 308
murmurs, damping of sound, 352
muscle. *See also* Myocardium
actin from, 187, 474
development of rigor mortis, 218
myocardium. *See* Myocardium
necrosis, potassium deficiency and corticosteroids, 420
output
during exercise in dogs with pulmonary stenosis, 410
effect of hypotensive agents, 468
measurement, by Fick and photoelectric earpiece methods, 80
response to thermal burns, 468
oxygen uptake during acute red cell increments, 172
performance in dogs with pulmonary stenosis, 410
peripheral resistance increase, response to, 33
phosphorylase activity, effect of epinephrine, 199
potassium
deficiency in necrosis, 420
exchange, 279
rigor mortis, development of, 218
size, 448
tension and stress in man, 91
toad, epinephrine effects on activity of, 199
ventricles. *See* Ventricle
virus effects, 572
work rate
influence of coronary flow on, 522
oxygen usage, coronary perfusion pressure and flow, 497, 501, 510
relation between coronary blood flow and myocardial oxygen usage, 514
Heart disease, congenital, produced by influenza A virus and allantoic fluid in chick embryo, 572
Heart failure
congestive, and acetyl strophanthidin on myocardial electrolyte and water content, 207
oxygen usage, coronary perfusion pressure and flow, 497, 501, 510, 514, 522
Heart-lung preparation, atrial and ventricular rhythms in the dog, 39
Heart murmurs, damping of sound, 352
Heart muscle. *See also* Myocardium
actin from
amino acid composition, 474
isolation, purification, and properties of, 187
left ventricular tension and stress in man, 91
temperature on development of rigor mortis, 218

Heart rate
coronary perfusion pressure and flow on myocardial oxygen usage, 497
effect on potassium flux, 279
Eledoisin, effect of, 329
left atrial and left ventricular end-diastolic pressures, 261
oxygen consumption
in nonworking heart, 501
in working heart, 510
Heart size, effects of respiration and muscular exercise in man, 448
Heart sounds, damping of, 352
Hematocrit, myocardial blood flow in anemia, 172
Hemodynamics, atrial and ventricular pressures, 261
Hemorrhage, precapillary and postcapillary resistance, capacitance, filtration, and absorption, 105
Histamine, pulmonary blood flow during right-heart catheterization, 119
Histochemistry, of coronary atherogenesis, 401
Hydralazine, effect on circulatory responses to severe thermal burns, 468
Hydrogen, diffusion into pulmonary arterioles, 71
5-Hydroxytryptamine, blood platelet and cell aggregation, 392
Hypercapnia, test for cerebral circulation, 436
Hypertension
pulmonary arterial, in newborn calf, 557
renal, vasopressor material in, 552
Hypervolemia, dextran, myocardial blood flow, and oxygen uptake in anemia, 172
Hypotension, depressor effects of renal medullary extracts, 359
Hypotensive agents, effect on cardiac output, 468
Hypothermia, effect of epinephrine on mechanical and phosphorylase activity of hypothermic heart, 199

I

Indicator dilution, radioalbumin studies of cerebral blood flow, 436
Influenza A virus, and allantoic fluid in production of congenital cardiac disease in chick embryo, 572
Ions, effects on blood vessels, 223
Isolation, effect on development of atherosclerosis, 246
Isoproterenol, myocardial necrosis produced by, 159

K

Kidney
angiotensin effects in pregnancy, 232
depressor effects of renal medullary extracts, 359
liberation of renin by, 336
nutrient blood flow distribution determined with Kr^{85}, 290
renal hypertension and vasopressor material, 552
Krypton^{85}, determination of intrarenal nutrient blood flow distribution, 290

L

Lipids, in early coronary atherogenesis, 401
Lung. *See also* Pulmonary circulation
blood flow patterns produced by right-heart catheterization, 119
diffusion of hydrogen into through large vessels, 71
heart-lung preparation, 39
Lymph, angiotensin in, 336

M

Medulla, renal, depressor effects of extracts from, 359
Membrane potentials, atrioventricular conduction system, 308
Microembolism, by 5-hydroxytryptamine, 392
Mitral valve, pressure gradient and flow, 261
Mucopolysaccharides, in early coronary atherogenesis, 401
Multipole theory, body surface potentials from intramyocardial electrodes, 373
Murmurs, heart, damping of sound, 352
Muscle. *See also* Heart muscle and Skeletal muscle
actin from, 187, 474
exercise, effect on heart size, 448
vascular, effects of potassium and *l*-norepinephrine on, 346
Myocardium
body surface potentials from implanted generators, 373
contractility, effect of Eledoisin, 329
effect of high-voltage electric current at different phases of cardiac cycle, 21
electrolyte content in congestive heart failure, 207
necrosis, serum enzymes, and adrenal steroid in rats, 159
oxygen uptake and blood flow during anemia, transfusion, and dextran, 172
oxygen usage
alterations of coronary blood flow in nonworking heart, 501
alterations of coronary blood flow in working heart, 510
effect of coronary perfusion pressure and flow, 497
relation between coronary blood flow and, 514, 522
water content in congestive heart failure, 207

N

Necrosis
cardiac, potassium deficiency and corticosteroids, 420
myocardial, serum enzymes, adrenal steroids, and histopathological alterations in rats, 159
Nerves. *See also* Sympathetic nervous system
adrenergic stimulation, antagonistic effect in sinoatrial node, 388
Nitrogen, and ductus arteriosus circulation, 478
Nitroglycerin, on coronary blood flow, comparison with Eledoisin, 329
Norepinephrine
effect on vascular smooth muscle, 346
reactivity of minute vessels in hemorrhage and shock, 105
relation to potassium, 346

O

Ouabain, arrhythmia induced by, 132
Oxygen
effects on ductus arteriosus circulation, 478
myocardial usage
alterations of coronary blood flow in nonworking heart, 501
alterations of coronary blood flow in working heart, 510
effect of coronary perfusion pressure and flow, 497, 501, 510
relation between coronary blood flow and, 514, 522

uptake during acute red cell volume increments, 172

P

Peripheral resistance
relation to sodium, 223
response of heart to, 33
Phosphorylase, effect of epinephrine on mechanical and phosphorylase activity of heart, 199
Photoelectric earpiece, comparison with Fick measurement of cardiac output, 80
Polypeptides, effects on coronary blood flow, 329
Potassium
and cardiac necrosis, 420
effect on vascular smooth muscle, 346
exchange in dog heart, 279
release from vascular system, 223
Potentials
body surface, distribution analyzed by computer, 373
membrane, responses of atrioventricular conduction system, 308
Pregnancy, renal effects of angiotensin, 232
Pressure. *See also* Blood pressure
coronary perfusion, and myocardial oxygen usage, 497, 501, 510, 514, 522
left atrial and left ventricular end-diastolic, relation between, 261
pulsatile, and flow analysis in distensible vessels by computer, 3
renal arterial, angiotensin in blood and lymph after reduction in, 336
transients in aorta, 585
transmural, effects on atrial and ventricular rhythm in the dog, 39
venous, effect of angiotensin on, 239
Pulmonary artery
constriction, cardiac performance during exercise, 410
flow and pressure, effects of oxygen and nitrogen ventilation in fetal lambs, 478
hypertension in newborn calf, 557
Pulmonary circulation
blood flow patterns produced by right-heart catheterization, 119
diffusion of gases and, 71
pulmonary arterial hypertension in newborn calf, 557
Pulmonary stenosis, cardiac performance in dogs with, 410
Purkinje fibers, conduction of premature atrial responses, 308

Q

QRS, nondipolar patterns, digital computer analysis, 373

R

Radioalbumin, cerebral blood flow studies by carotid artery injection, 436
Radioisotopes
disappearance rate, 56, 290
effect of epinephrine on disappearance rate and blood flow in human calf muscle, 56
intrarenal blood flow distribution determined with Kr^{85}, 290
NaI^{131}, effect of epinephrine on disappearance rate, 56
radioalbumin, in cerebral blood flow studies, 436
Rat, perfusion of tail, 223
Red blood cells, myocardial blood flow and oxygen uptake during acute increments, 172
Renal circulation
effects of angiotensin in pregnancy, 232
intrarenal blood flow distribution determined with Kr^{85}, 290
vasopressor material in renal hypertension, 552
Renal medulla, depressor effects of extracts from, 359
Renin, release during reduced renal perfusion pressure, 336
Reserpine, influence on digitalis-induced ventricular arrhythmias, 149
Resistance
peripheral
relation to sodium, 223
response of heart to, 33
Respiration
acidosis, influence on circulatory effects of epinephrine, 64
effects on heart size, 448
Rheology, of human blood, 48
Rhythm, atrial and ventricular, effects of transmural pressures, 39
Rigor mortis, influence of temperature on development in heart, 218

S

Serotonin, aggregation of blood cells by, 392
Shock
burn, circulatory responses, 468
hemorrhagic, precapillary and postcapillary resistance, capacitance, filtration, and absorption, 105
Sinoatrial node
antagonistic effects of acetyl strophanthidin and adrenergic stimulation on, 388
rhythm affected by right- and left-heart pressures, 39
Skeletal muscle
actin from, compared with actin from heart muscle, 187, 474
capillary filtration transfer in cat, effect of hemorrhagic shock, 105
difference in behavior from cardiac muscle, 474
Sodium, release from vascular system, 223
Sodium iodide, radioactive, effects of epinephrine on disappearance rate and blood flow in human calf muscle, 56
Sound, damping of on chest surface, 352
Sphincters, arteriocapillary and capillary, 105
Stenosis
poststenotic dilatation of carotid and femoral arteries, 537
pulmonary, cardiac performance, 410
Steroids *See also* Corticosteroids
adrenal, myocardial necrosis in rats, 159
Stress, left ventricular, in man, 91
Sympathetic nervous system
antagonistic effects on sinoatrial node of acetyl strophanthidin and adrenergic stimulation, 388
stimulation frequency and reactivity of minute vessels in hemorrhage and shock, 105

T

Temperature, influence on development of rigor mortis in heart, 218
Tension, left ventricular, in man, 91
Thermal injury, circulatory responses to effects of hydralazine and dextran, 468

Thrombogenesis, thromboplastic and fibrinolytic activity in arteries, veins, and wall layers, 253
Thromboplastic activity, in aorta and veins, species differences, 253
Thrombosis, in rats fed high-fat diets, 529
Tissue
clearance, NaI^{131}, epinephrine, and blood flow in human calf muscle, 56
electrolytes, acetyl strophanthidin and myocardial electrolyte and water content in congestive heart failure, 207
βTM 10, influence on digitalis-induced ventricular arrhythmias, 149
Toad, effect of epinephrine on mechanical and phosphorylase activity of heart, 199
Transaminase, in serum during myocardial necrosis produced by isoproterenol, 159
Transfusion, myocardial blood flow and oxygen uptake during anemia, 172
Transmural pressure, effects of increase on atrial and ventricular rhythms in the dog, 39
Trauma, *See also* Shock
thermal, 468
Trimethyl[2-(2,6-dimethylphenoxy)propyl]trimethylammonium chloride (βTM 10), effect on digitalis-induced arrhythmias, 149
Turbulent flow, and endothelial injury, 580

V

Vasa recta, blood flow in, 290
Vascular reactivity, during shock, 105
Vasodilators, the polypeptide, Eledoisin, 329
Vasopressors, in renal hypertension, 552
Veins
catheterization and reflex effects on pulmonary blood flow, 119
forearm, effect of angiotensin on, 239
thromboplastic and fibrinolytic activity in wall layers, 253
Vena cava, thromboplastic and fibrinolytic activity in wall layers, 253
Venous pressure, effect of angiotensin on, 239
Venous tone, effect of angiotensin on, 239
Ventricle
arrhythmia, digitalis-induced, effects of reserpine and βTM 10, 149
electrical defibrillation, 21
left
end-diastolic and atrial pressure, 261
response to increased peripheral resistance, 33
tension and stress in man, 91
rhythm, effect of increased transmural pressures, 39
right
catheterization on pulmonary blood flow, 119
changes in exercising dogs with pulmonary stenosis, 410
Ventricular fibrillation, by condenser discharges, 21
Venules, reactivity, vasoconstrictor nerve impulses, and norepinephrine, 105
Vessels
damage to walls by turbulent boundary layer flow, 580
distensible, pulsatile pressure and flow by computer analysis, 3
resistance and capacitance, effect of hemorrhagic shock on reactivity, 105
Virus, congenital malformations produced by influenza A in chick embryo, 572
Viscosity, of blood, effects of fibrinogen, 48

W

Water, myocardial content in congestive heart failure, 207
Wiggers, Carl John, a memorial tribute, 1
Wolff-Parkinson-White syndrome, single vs. dual atrioventricular transmission system, 308

ERRATUM

Second sentence of footnote on page 213, Volume 13, No. 3 should read:

A copy may be obtained by citing the Document number and remitting $2.00 for 35 mm microfilm or $3.75 for photoprints.

ERRATUM

Volume XI. November 1962. page 844. *An asterisk should be added to the end of the last sentence of the Results, just prior to the Discussion. The following footnote should have appeared at the bottom of the page:*

*Photomicrographs 4 to 15 have been deposited as Document number 7203 with the ADI Auxiliary Publications Project, Photoduplication Service, Library of Congress, Washington 25, D. C. A copy may be obtained by citing the Document number and by remitting $2.50 for photoprints, or $1.75 for 35 mm. microfilm. Advance payment is required. Make checks or money orders payable to: Chief, Photoduplication Service, Library of Congress.
